CHOHO HIGH-END
INDUSTRIAL CHAIN--

CEMENT CHAIN

征和高端工业链条 水泥链

水泥链主要应用的领域为工程机械和散物料行业。工程机械和散物料是装备工业的重要组成部分，该行业链条主要分为输送链条和驱动链条，用于筑路机械、混凝土机械、开矿设备、滑移装载机等，其中包括摊铺机链条、驱动链条、沥青搅拌站链条、提升链条、钻机链条等。

The main application fields of cement conveyor chain are construction machinery and bulk material industry. Construction machinery and bulk materials are an important part of the equipment industry. Chains in this industry are mainly divided into conveyor chains and drive chains, which are used in road construction machinery, concrete machinery, mining equipment, skid steer loaders, etc., including paver chains, Drive chains, asphalt mixing plant chains, lifting chains, drilling rig chains, etc.

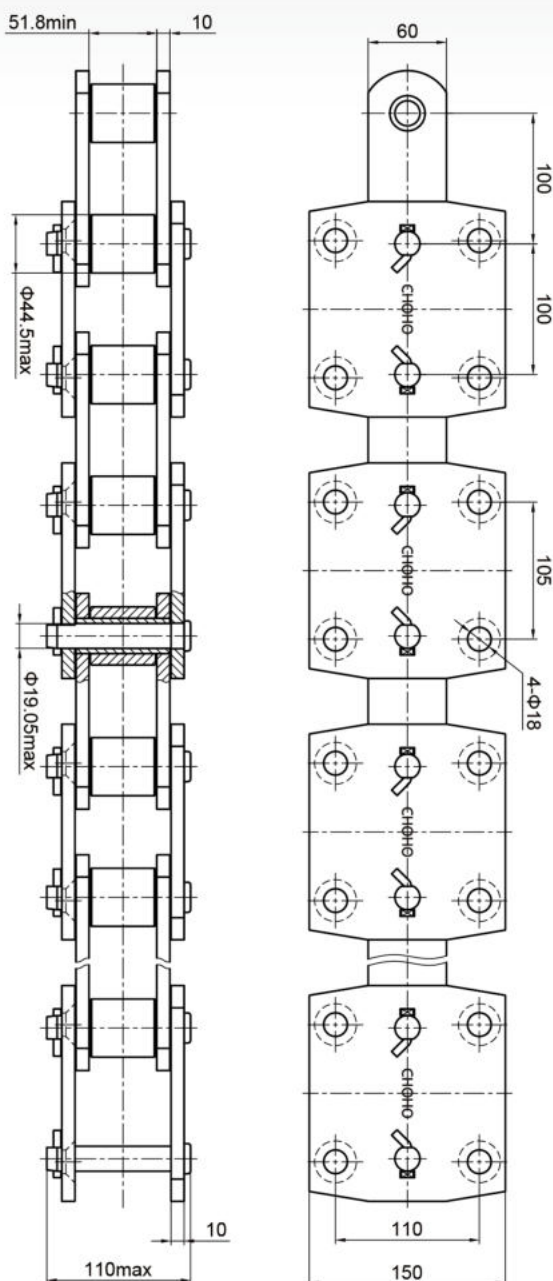

征和是链传动行业首家A股上市公司，是国家认定的企业技术中心，拥有强大的链系统产品生产制造能力和研发能力，征和水泥链条以性能稳定，平稳可靠著称。

As the first A-share listed company in the chain drive industry, CHOHO is the enterprise technology center recognized by the state. It has A strong manufacturing capacity and research and development capacity of chain system products. CHOHO cement machine chain is famous for its stable performance, stable and reliable.

征和链系统技术领导者
Choho, Chain Transmission Technology Leader

水泥链主要分为NE系列、NSE系列和中央提升系列，分别分布用于水泥原材料、粗加工原料、水泥熟料和成品、大型原料的提升作业。征和生产的工业链规格齐全，能够完整配套从石灰石等原辅料的取料直至熟料出厂生产线上的输送及取料设备，我们有完整的产品组合，且适用于大粉尘恶劣环境，为水泥生产厂提供全面的输送和链条产品配套服务。

Cement chain is mainly divided into NE series, NSE series and Central lifting series, which are respectively distributed for lifting operations of cement raw materials, rough processing raw materials, cement clinker and finished products, and large raw materials. The cement industrial conveyor chain produced by CHOHO has complete specifications which can be completely matched from the reclaiming equipment of raw and auxiliary materials such as limestone to the conveying and reclaiming equipment of clinker on the production line. We have complete product combinations which are suitable for large dust and harsh environments. We could provide comprehensive transportation and chain product supporting services to cement products factory.

水泥链应用于大粉尘恶劣环境、工作环境复杂，征和采用“两磨一烧”独特的工序以及焊接和精冲技术相结合，并采用独特的设计和工艺技术、具有自主专利技术的密封结构，避免粉尘进入，使得链条运行精度高、使用寿命长。

Cement conveyor chain is used in a harsh environment with large dust and a complex working environment. It adopts the unique process of "2 grinding & 1 burning" and the combination of welding and fine blanking technology, and adopts unique design and process technology, and a sealing structure with independent patent technology, to prevent dust from entering, making the chain run with high precision and long service life.
